

LIND EQUIPMENT

WORK CONFIDENTLY.

WATER-TIGHT INDUSTRIAL CORD REELS

6000 SERIES

Lind Equipment's 6000 series reels finally bring NEMA 4X watertight properties to an industrial cord reel. No longer do outdoor or wet area cord reel applications have to be met with heavy-duty all-steel reels. Parking lots, hospitals, kitchens, marine environments call all use this technology now without compromise. Molded polypropylene case sealed with cyanoacrylate provides a watertight seal and flame retarding properties.

Optional cord ends include single outlet (15A), or dual duplex hospital grade (green dot certified) outlets.

Cord types available include 16/3 and 14/3, available with cold weather cord (pictured).

Optional wall or ceiling mounting brackets for easy installation in almost any area.

Ask your Lind Equipment distributor for the full part number listing and assistance in selecting the best reel that meets your unique requirements.

For heavy-duty waterproof applications, see our 9500 series reels.
