

## 108W FLUORESCENT PORTABLE FLOODLIGHT

### HEAVY-DUTY HOUSING WITH POLYCARBONATE LENS

An extra bright heavy-duty flood light designed to provide energy efficient portable lighting without compromise.

The polycarbonate lens is virtually unbreakable and makes this light perfect for use in food and agriculture facilities or other areas where glass is prohibited. The durable plastic housing can take significant abuse and impact without breaking.

Twice as bright as the LE981 and built to take abuse, the LE990 is an ideal solution to your portable lighting requirements.

Comes as a light head only (LE990), which can sit upright on a surface using the yoke to stabilize. Or, it comes mounted on a 4-8' tripod (LE990-TR).

#### LE990

- 3 x 36W fluorescent lamps
- 8,250 lumens
- Light head weight: 10 lbs
- Indoor or outdoor use
- Tripod height adjustable from 4-8'
- 20' 18/3 SJTW cord
- Replacement bulb: LE990-P1
